SUMMARY

Frontend Engineer with 6+ years of experience building scalable, high-performance web applications using **Angular, React, TypeScript, and modern JavaScript (ES6+)**.

Experienced in developing modular, maintainable frontend architectures, including **microfrontend** and **Nx monorepo** environments, supporting large-scale enterprise and multi-tenant SaaS applications.

Proficient in building responsive, reusable, and accessible user interfaces with **Angular and React**, leveraging **RxJS, Redux/NgRx, Signals, Hooks, Context API, and modern frontend best practices** to create performant and maintainable applications.

Strong focus on performance optimization, reusable component design, efficient state management, lazy loading, code splitting, and API integration, ensuring fast and scalable user experiences.

Proven ability to collaborate with cross-functional teams to deliver user-centric solutions aligned with business requirements while maintaining high standards of code quality, reliability, scalability, and maintainability across complex systems.

SKILLS

- | | | |
|---|--|---|
| • Angular (v2+) & AngularJS | • React.js (Hooks, Context API, Redux Toolkit) | • TypeScript, JavaScript (ES6+) |
| • RxJS, Angular Signals | • HTML5, CSS3, Tailwind CSS, Bootstrap | • RESTful APIs, AJAX |
| • Nx Monorepo, Microfrontend Architecture | • Modular & Scalable Frontend Architecture | • State Management & Performance Optimization |
| • Lazy Loading & Code Splitting | • Git (GitHub), TFS | • CI/CD Pipelines |
| • RESTful API Integration | • Unit Testing (Jest/Karma) | • Agile Methodology |
| • AI Tools for Development (GitHub Copilot, Cursor) | | |

EXPERIENCE

Ministry of Industry and Mineral Resources, Saudi Arabia

10/2022 – Present

Front End Developer

- Developed and optimized custom Angular applications, enhancing performance by 25% and reducing load times by 30%.
- Implemented microfrontend architecture and lazy loading, improving code maintainability by 20% and enabling scalable development.
- Built and maintained reusable Angular components, increasing development efficiency and reducing delivery time by 15% using Agile methodologies.
- Integrated RESTful APIs within a modular architecture, ensuring scalable data flow and improving overall application stability and maintainability.
- Designed and developed dynamic web portals, enhancing overall user experience and application performance.

- Optimized application state management and data flow using RxJS, improving predictability and simplifying debugging across complex features.
- Developed responsive and reusable user interfaces using React, TypeScript, Hooks, and Context API, delivering scalable and maintainable frontend solutions.
- Implemented Redux Toolkit and React performance optimization techniques, including code splitting, lazy loading, React.memo, useMemo, and useCallback, improving application responsiveness and maintainability.

Select ICT, Cairo, Egypt

10/2021 – 09/2022

Front End Developer

- Developed web applications using Angular and the ABP Framework, improving page load speed by 20% and building modular, reusable components that reduced development time by 15%.
- Designed and developed a survey system, supporting over 2,500 users.
- Adopted microfrontend architecture to streamline code management and enhance application maintainability.

Gulf Data, Saudi Arabia

06/2020 – 09/2021

Front End Developer

- Collaborated on UI design and development for the Gulf Date platform, improving user engagement by 30%.
- Created responsive layouts using Material UI and Bootstrap, reducing bounce rates by 20%.
- Enhanced interactivity using JavaScript and jQuery, contributing to a 15% increase in user.

EDUCATION

Faculty of Computer and Information, Mansoura University

Bachelor of Science in Computer and Information

Graduated with a GPA : 3.5

COURSES

Angular - The Complete Guide (2024 Edition)

All About Angular From Zero to Hero (2021 Edition)

Vue.js Fast Crash Course
